Introduction

The Operation and Maintenance, Navy (O&M,N) appropriation finances the day-to-day costs of operating naval forces, including fuel, supplies, and maintenance costs of ships, Navy and Marine Corps aircraft, other related weapon systems, and the support establishment ashore for naval forces.

The FY 1997 estimate of \$20,196.2 million includes price growth of \$654.2 million which is partially offset by the one-time FY 1996 DBOF passthrough of \$595.1 million provided to closing DBOF activities. Price increases primarily result from Defense Business Operations Fund (DBOF) materials and supplies price changes, Shipyard and Aviation depot rate increases, Defense Finance and Accounting Service (DFAS) rate increases, and other purchases inflation. Program growth declines by \$1,221.8 million which includes program reductions of \$1,172.2 million and net transfers of \$-49.6 million. Significant transfers include the transfer of the Subsistence in Kind (SIK) program to the MPN appropriation, the transfer of funding for the Navy's share of Pentagon Renovation into the O&M,N appropriation and the transfer of Defense Finance and Accounting Service (DFAS) support funding for the Bureau of Medicine and Surgery to the Defense Health Program. Major program decreases include reduced ship maintenance due to availability and mix, OPTEMPO decreases consistent with reduced force structure and contingency operations requirements. Other program decreases include management initiatives to restructure and streamline maintenance infrastructure and decreases resulting from Base Closure savings.

Readiness continues to be our primary focus with flying hour and ship operations programs funded to meet Primary Mission Readiness (PMR) and Operating Tempo (OPTEMPO) goals, while maintaining manageable levels of airframe, aircraft engine and ship maintenance backlogs. Congressional funding for incremental flying hours and deployed operating tempo in support of contingency operations are included. Full funding of all known Class I and Class II environmental projects is also included.

The Navy has funded overall ship depot maintenance at 95 percent of requirements in FY 1996, and at 90 percent of requirements in FY 1997. Only unfunded overhauls are counted toward the financial backlog. Other types of unfunded ship depot maintenance are not included in the financial backlog because the maintenance will be deferred to the next scheduled depot maintenance availability or will be accomplished through other means, e.g. at the intermediate maintenance level or by the ship's force, if the capability exists at these lower levels of maintenance, or as an emergent repair at the depot level.

The Navy historically maintains a manageable backlog goal of 100 airframes and 250 engines for active aircraft maintenance. The estimated manageable backlog level is approximately 112 airframes/250 engines in FY 1996, followed by a return to the goal in FY 1997 of 100 airframes/250 engines. This table does not include the cost of this manageable backlog as part of the financial backlog. The manageable backlog is a valid requirement and represents those assets have been identified for depot maintenance but have not yet been inducted into the depot. Navy policy permits a 90 day window between the time an asset has been identified for depot work and the time it enters the depot. Because the manageable backlog is a factor of timing flexibility more than a direct result of funding constraints, the cost of the manageable backlog is not included as part of the financial backlog. The value of this manageable backlog in FY 1995 through FY 1997 is \$176.4 million/\$132.6 million/\$183.9 million, respectively.

Department of the Navy
Environmental Restoration, Navy
FY 1997 President's Budget Request

This program finances the Cleanup of Navy and Marine Corps installations and restores them to standards as outlined in the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), as amended by the Superfund Amendments and Reauthorization Act (SARA), as well as regulations issued under these acts or by State law. The program is primarily designed to cleanup past releases of any pollutant or contaminant that endangers public health, welfare, or the environment to include petroleum, oil, and lubricant products.
